Muhammad Maaz

Full-Stack & Agentic AI Developer

Portfolio | LinkedIn | GitHub | mmaazy2547@gmail.com | +92-348-8859462

Core Competencies

- AI & Agentic Systems
- Multi-Agent Architectures
- RAG & Vector Embeddings
- Digital FTEs & AI Workers
- Spec-Driven Development
- Workflow Automation
- Tool Integration
- Task Planning & Memory
- Prompt & Context Engineering

Skills

AI & LLM Stack
OpenAI Agents SDK, LangChain, RAG Pipelines, Qdrant, ChromaDB, Vector Embeddings, GPT-4 Vision, Hugging Face, Chainlit, Streamlit

Backend & Databases
Python, FastAPI, Node.js, PostgreSQL, Prisma, Supabase

Frontend
Next.js, React.js, TypeScript, JavaScript, Tailwind CSS, GSAP, Zustand

Cloud & DevOps
Docker, Kubernetes (fundamentals & deployment), GitHub Actions, Vercel, Render, Railway

Tools
Git, GitHub, Figma, Sanity CMS

Professional
Problem Solving, Communication, Team Collaboration, Adaptability, Continuous Learning

Education

Intermediate — Pre-Engineering
Govt. Degree Boys College, Quaidabad, Karachi
2023 – 2024

Matriculation — Science
Read Foundation High School, AJK
2021 – 2022

Languages

English — Professional working proficiency
Urdu — Native

Professional Summary

Full-Stack & Agentic AI Developer who builds production-grade multi-agent systems, RAG pipelines and end-to-end web applications. I turn manual business workflows into autonomous "Digital FTEs" using the OpenAI Agents SDK, LangChain and vector databases, and ship them on modern cloud infrastructure with Docker and CI/CD. Eight self-built projects, publicly deployed and open on GitHub.

Work Experience

Full-Stack & AI Developer | Blooginga Tech Solution
Jul 2026 – Present

- Building and maintaining **full-stack web applications** with Next.js, TypeScript and FastAPI — from database schema to deployed UI.
- Integrating **LLM-powered features** (content generation, semantic search and workflow automation) into live client products.
- Owning architecture decisions, code reviews and cloud deployment to keep releases fast and reliable.

Agentic AI Developer | DigiCop Solutions
Mar 2026 – Jun 2026 · 4 months

- Designed & deployed **multi-agent systems** using the **OpenAI Agents SDK** with reasoning-based workflows and API integrations.
- Built production-grade **RAG pipelines** with LangChain & OpenAI Agents on **Qdrant** and **ChromaDB**.
- Architected agentic & RAG-based solutions that improved **operational efficiency** through AI automation.

Mathematics Teacher & Office Administrator | Diamond Public Schooling System
Zafar Town, Malir, Karachi · 2023 – 2025

- Taught **Mathematics** across diverse grade levels for two academic years.
- Managed administrative & front-office operations, staff coordination and parent communication.

Key Strengths

- **End-to-end ownership** — from spec-driven design to a deployed, scalable product.
- **Agentic AI & RAG in production** — multi-agent orchestration, task planning, memory and tool integration.
- **Cloud-native delivery** — Docker, Kubernetes, GitHub Actions and multi-platform deployment.
- **Real, deployed systems** backed by a public portfolio and GitHub — not tutorial clones.

Certifications & Training

Generative AI Application Developer

★ TOP PERFORMER AWARDED

UETIANS Lahore Endowment Foundation, USA — in collaboration with NCEAC-HEC & Pak Angels.
NCEAC-HEC Gen-AI Training, Cohort 3 · Mar – May 2026

Verify certificate ↗

Governor's IT Initiative — AI, Web 3.0 & Metaverse · Govt. of Pakistan · 2025 – 2026 (Ongoing)

Featured Projects

I build real things, not tutorial clones.

WhatsApp Support-Ticket Automation — Silent Agentic System
Python, Agentic AI, Local LLM (On-Prem), Google Sheets API
Privacy-first agent that silently monitors a WhatsApp support group, filters chatter and auto-files structured tickets to Google Sheets — runs on a local LLM, so no data leaves the organisation.

Digital AI Employee — Multi-Agent Automation *(In Development)*
OpenAI Agents SDK, Python, FastAPI, RAG, Docker, Kubernetes
Autonomous multi-agent system with task planning, persistent memory, tool integration and end-to-end workflow automation.

Physical AI & Humanoid Robotics — RAG Chatbot
FastAPI, Qdrant, Next.js, Multi-Agent Architecture, RAG
Domain-specific RAG chatbot with semantic search and multi-agent reasoning; deployed on Vercel and Render.

AR Book Mart — Full-Stack E-Commerce Platform
Next.js, React, TypeScript, Tailwind, Sanity, Prisma, PostgreSQL
E-commerce platform with headless CMS, checkout, payments, admin panel, PDF invoices and a fully responsive UI.

ZaraatAI — Crop Disease Detection System
Next.js, Node.js, TypeScript, Tailwind CSS, GPT-4 Vision
AI crop-disease detector with bilingual output, treatment suggestions, PDF reports and medicine recommendations for farmers.

AI-Powered Task Management System
Next.js, FastAPI, OpenAI API, PostgreSQL
Smart task manager with NLP-based task generation, reminders, authentication and persistent storage.

Agentic Essay Pilot
Next.js, OpenAI API, Agentic AI, Vercel
AI writing assistant that handles topic analysis, outline planning and structured essay generation.

CV Generator
Next.js, TypeScript, Tailwind CSS, Vercel
Resume builder with customizable templates, live preview, real-time editing and instant PDF export.

Achievements & Recognition

- ★ **Top Performer Award** — NCEAC-HEC Generative AI Training, Cohort 3 (2026)
- **8 products shipped end-to-end** — designed, built and deployed independently
- **Selected for the Governor's IT Initiative** — AI, Web 3.0 & Metaverse, Govt. of Pakistan
- **Self-taught career switch** — from Mathematics teaching to full-time AI engineering

What I Can Build For You

- **Autonomous AI agents** & Digital FTEs that run 24/7
- **Full-stack web apps** & e-commerce platforms
- **On-prem / private LLM** solutions for sensitive data
- **RAG chatbots** trained on your own documents
- **Workflow automation** & third-party API integrations
- **Cloud deployment**, containerisation & CI/CD pipelines
